

Dear Abington Senior High School Parents and Guardians,

I write to share more information regarding today's early dismissal at Abington Senior High School. Recent construction work outside the building related to roofing has created an unpleasant tar odor in the school. We understand that this has made for a learning environment that was not ideal, and the decision was made to dismiss early in the best interest of students and staff.

Please be advised that regular air quality testing is conducted in various locations throughout the Senior High by a third-party company, Eagle Industrial Hygiene Associates, Inc., as safety is our top priority. Results of this air quality testing are publicly available on our website: <http://www.abington.k12.pa.us/departments/facilities>.

Ensuring a safe, comfortable and productive learning environment is a constant focus for administration throughout the duration of the Abington Senior High School Additions and Renovations project. We are working with the construction team to resolve the situation before tomorrow's school day, and will continue to work with them closely to minimize the impact of construction on our learning environment.

If you have questions, please call my office at 215-884-4700, x2360.

Regards,

Angelo Berrios

Principal, Abington Senior High School
